

# Introducing Ollin.

Unique, responsive and  
expertly designed, Ollin helps  
you interact with technology as  
seamlessly as possible.

Constantly shifting and morphing with each day, the world of business is never static. A productive workplace should reflect this in its ability to evolve with changing business requirements. Cloud computing and the use of hybrid laptop/tablets are shifting how and why we use computer screens, and developments in technology are increasing the need for the workplace to be even more responsive.

Unique, responsive and expertly designed, Ollin is a dynamic monitor arm that encourages users to interact with technology and each other as seamlessly as possible.

#### SEE THE LIGHT

As technology advances, screens are becoming lighter and often more compact. The elastomeric properties in

the technical cord that controls Ollin's arm mean it can accommodate weights from 0kg up to 9kg. And as the trend for screens to become lighter, or combine as a tablet/laptop continues, Ollin can grow with you and your business

#### TWO GOOD

Dual screen working is becoming increasingly prevalent in the workplace. Because Ollin is easy to customise and adapt, it supports this shift in working styles. A dual screen mount can be attached to the main arm, improving user productivity by allowing them to switch smoothly between different applications. And because there's no need to provide a separate arm for each screen, expenditure is kept to a minimum while productivity increases. A cost effective, future proof solution to the changing configuration of the workstation.

## OVERVIEW

- Monitor weight range: 0 - 9kg
- Horizontal reach: 674mm (26.5")
- Vertical adjustment: 346mm (13.5")
- Monitor head: VESA 75 and 100 compliant
- 180° stop function/360° capability
- Suitable for multi-screens, laptops and tablets
- Available in white, silver and black
