

Saarinen Tulip Chair and Stool

In his purist approach to architecture and interior design, Eero Saarinen sought the essential idea and reduced it to the most effective structural solution within an overall unity of design. Eero Saarinen vowed to address the “ugly, confusing, unrestful world” he observed underneath chairs and tables – the so-called “slum of legs.” A five-year design investigation led him to the revolutionary Pedestal Collection. The collection is a defining accomplishment of modern and a true classic. In Tulip, a collection of chairs and stools defined by a single-legged pedestal, Saarinen realised his ideal of formal unity.
